How secure is your website?

Wilfred - 2019-01-22 - in Website

Very secure as we do host our websites on our own servers Located in the Netherlands.

Our complete website is on https:// that means all communication from server to your pc and vice versa is encrypted through SSL (secure socket layer).

Further, Nirvana will never hand out your personal details to any third party. We use thee details solely to process your order.

This Support Software 'DeskPro' we hosting completly on our own server for security reasons.

Instead of using online extrenal locations as SAAS or third party locations. we try to use no tracking software accept google analytics.
