## Security

Wilfred - 2019-11-20 - in Security

We cannot disclose all the security measures we've taken but here are some of them:

- Dataconnections between you (your webbrower) and our servers are encrypted. through SSL
- Our websites are on privately owned servers located in the Netherlands. Images (and some other static resources) are on a CDN (Content Delivery Network).
- All (personal) data stays where it belongs, safely stored. We only use randomized data for testing and this is done on a local secured network.
- Nirvana will never hand out your personal details to any third party without your consent.
- Occasionally we use a screentracker to analyze what links are clicked.
