Stealth shipping

Wilfred - 2019-11-20 - in [Stealth shipping](#)

We at Nirvana understand how important privacy is for our customers and we take pride in our stealth shipping method. Not only do we hide the seeds crafty in our sturdy, stealthy packages, we also took the liberty to create a complex shipping route for them. This has increased our delivery success rate and is the reason your packages take a bit longer to arrive.

Nirvana products usually come in an envelope. For product like grow kits we use small and sturdy cardboard boxes. Most of them will fit in your mailbox.

We know you are curious to what your packages looks like, but sadly we cannot show you in advance, because this would compromise our operation!
