CoinBase does not recognise the Litecoin address

Donald Nirvana - 2018-02-22 - in Payments

At Coinbase you can pay with Litecoin. However, Coinbase does not recognise the new-style Litecoin address (starting with 'M') that is generated by our payment provider. To resolve this, follow these steps:

1. Go to <https://litecoin-project.github.io/p2sh-convert/>
2. Paste the 'M'-address in the P2SH value field and click 'convert'
3. The result is an address that starts with '3'
4. Use the 3-address for your payment
